one broken from the other pair, the boat could not be managed by one man without any nautical knowledge.

A radio message was despatched to the Port Captain at Malaga and on arrival off the breakwater the Pilot Launch came alongside. After the situation had been explained to the Pilot he spoke to the rescued man and confirmed the information we had obtained, with the added information that 'He was touring the world'. It was not quite clear whether he intended touring the world in the dinghy or was just out for the afternoon during the course of his world tour! The Pilot took Felipe Andreo ashore in the Pilot Launch and towed the dinghy in with them."
